

HIPPOTIZER PORTAMUS

Power and portability

two attributes rarely found in a media server. Meet the Hippotizer V4 Portamus.

1x output via mDP or HDMI

Supports output splitters on mini DisplayPort

Includes all features of the Hippotizer Version 4 range

4K Playback

Designed around the same feature set as its bigger family members, this laptop based server, running Hippotizer V4 holds all the tools necessary to perform world class events and includes all the well-loved features from the Hippotizer V4 range.

Key Features

Multiple outputs

A range of native outputting options including mDP and HDMI

3D Mapping

A complete, intuitive, 3D Projection Mapping toolset with SHAPE.

Visualisation

Full resolution 3D visualization tool to pre-program your project.

Media Management

Multiple options for viewing encoded media's size, mapping locations and other key attributes.

HippoNet

Built-in networking protocol connecting all Hippotizer's together and managed by our free software management tool, ZooKeeper.

MultiController

Lighting desk and third party visualizer integration with CITP with added support for sACN

PixelMapping

The modern approach to showing video across lighting fixtures with advanced protocol support and huge outputting power.

Accessible hardware
